Googling tips

- Use quotes to get an "EXACT" match
- Search for a particular filetype with filetype:
- Filter out searches with AFTER:, BEFORE: or .. between two numbers

Git

-Git is a distributed version control system that tracks versions of files. It is often used to control source code by programmers collaboratively developing software.

- Version control software keeps track of every modification to the code in a special kind of database. If a mistake is made, developers can turn back the clock and compare earlier versions of the code to help fix the mistake while minimizing disruption to all team members.

Github

-GitHub is a website and cloud-based service that helps developers store and manage their code, as well as track and control changes to their code.
